

More options for the markets strongest HMI

Profibus DP

For increased connectivity Pro-Face is now releasing Profibus module for the AGP3000 series. With the Profibus adapter you can connect up to 32 nodes, it supports transfer speeds up to 12 Mbps.

For latest version of the GSD file please go to the download side.

Cables for Siemens MPI direct

AGP3000 offers MPI direct communication with Siemens S7 300/400 up to full speed 12Mbps. To ensure high speed connection it is advised that our cables are used. Part number for 3m cables is: GP3000-MPI-PFE

Improved addressing for Siemens PLC

GP-PRO EX has a new driver for Siemens S7 (both MPI and Ethernet) which is **much easier** to use, compared to previous versions. In the new driver it is no longer necessary to predefine which data blocks that you want to get data from, just address any bit or word in any data block you want.
